

NAFIUR RAHMAN

St. John's, NL, | P: +1 (709) 771-0937 | nafiur@mun.ca | [LinkedIn](#) | [Portfolio](#) | [GitHub](#)

PROFILE OF SKILLS:

Programming Languages: Python, JavaScript, TypeScript, C#, SQL

Web/Mobile: React, Next.js, Vue.js, Nuxt.js, Expo (React Native), HTML, CSS, Tailwind

Data Science/Machine Learning: NumPy, Pandas, Scikit-learn, PyTorch, PostGIS, Leaflet, Chart.js, Apache ECharts

Backend/Cloud: FastAPI, Express.js, AWS (Lambda, S3, SNS, DynamoDB, CodePipeline), Supabase

Databases/Tools: PostgreSQL, MongoDB, Terraform, Git, Linux/WSL, JIRA, Claude Code, Android Studio, Xcode

EDUCATION:

Memorial University of Newfoundland

Master of Science in Computer Science

Fall 2025 - Present

St. John's, NL

- Expected Graduation - August 2027

American International University - Bangladesh

Bachelor of Science in Computer Science and Engineering

Spring 2020 - Summer 2023

Dhaka, Bangladesh

- Dean's List Honors

TECH EXPERIENCES:

Angler Solutions Inc.

Graduate Internship - Software Developer

January 2026 - March 2026

Hybrid | St. John's, NL

- Developed a core **Techno-economic** model using Python for Model for Energy Systems Optimization software
- Designed an **AWS Cloud based** testing architecture to automate testing for the mathematical models
- Implemented visualization charts using **Apache ECharts** to facilitate feasibility analysis for energy projects
- Developed a preferred timezone feature, enhancing UX for global application users

Idee Digital

Software Developer

September 2023 - October 2025

Remote | Queensland, Australia

- Developed and Maintained a cross-platform **React-Native** Application
- Optimized a cloud process that resulted in a **240x** reduction in terms of monthly invocation
- Developed an Admin panel with content management system using **NextJS, AWS Lambda and DynamoDB**
- Implemented push notification feature using **Firebase Cloud Messaging** and AWS Simple Notification Service

ACI Motors Limited

Internship - Data Science

June 2023 - August 2023

On-site | Dhaka, Bangladesh

- Cleaned, Analyzed, and visualized business data using **SQL, Python - Pandas and Matplotlib**
- Performed **EDA** on sales data, provided insights for accurate territory-wise budget predictions
- Developed an internal **automation tool with Python** that reduced the data preprocessing time by **75%**
- Processed and visualized **IoT and geographical data**, enhancing data-driven decision-making

OTHER EXPERIENCE:

Teleperformance Canada

Operations Customer Expert – Travel Consultant

November 2024 - August 2025

Remote | Toronto, ON

- Handled over 2000 customer travel inquiries via inbound calls, outbound calls and emails
- Closely worked with corporate travel managers to plan international travel for corporate executives
- Escalated issues to the appropriate settlement departments to facilitate specific customers

ACADEMIC PROJECTS:

Evaluation of YOLOv10 Against Adversarial Patches

Python, Pytorch, ART

January 2026 – April 2026

Group Project | Machine Learning

- Assessed YOLOv10 robustness adversarial attacks using a PGD-based optimization pipeline
- Analyzed performance across various rotations and sizes, observing a 32.7% F1 score drop at 250px patch sizes
- Investigated cross-architecture transferability to Faster R-CNN and evaluated bilateral filtering as a defense against digital and physical patches

Student TradeHub

MERN Stack, GitHub Actions, CI/CD

September - December 2025

Group Project | Software Engineering

- Built an online marketplace for Memorial University students following Agile methodologies
- Implemented email authentication restricted to @mun.ca domains for verified user access
- Integrated a CI/CD pipeline using GitHub Actions to automate testing and deployment processes

Mood Controlled Ambient Lighting

FastAPI, React, OpenCV, Deepface

September - December 2025

Solo Project | Advanced Interaction Techniques

- Developed a system to process real-time facial expressions to adjust workspace lighting
- Classifies emotions (Happy, Sad, Anger, etc.) to bridge human interaction and environment enhancement
- Mapped detected emotions to specific ambient lighting profiles to improve user workspace ambience

OTHER PROJECTS:

CholoGo

Expo (React Native), FastAPI, Supabase

April 2026 - Present

Group Project | Mobile Application Development

- Developed a system to process real-time facial expressions to adjust workspace lighting
- Classifies emotions (Happy, Sad, Anger, etc.) to bridge human interaction and environment enhancement
- Mapped detected emotions to specific ambient lighting profiles to improve user workspace ambience

Surescan

NextJS, FastAPI, PostgreSQL

December 2024 - Present

Group Project | SaaS Development

- Building a product authentication SaaS platform utilizing QR codes to combat counterfeit products in the market
- Processing diverse scan data to generate actionable supply chain analytics and insights for retail stakeholders
- Implemented GIS data processing and shapefile integration for area-wise heatmap visualizations of scan activity

[Wishtrovert](#)

NextJS, Supabase, Vercel

February - November 2025

Group Project | Social Platform Development

- Developed a full-stack wishlist management platform using NextJS to streamline thoughtful gift-giving
- Built a secure social environment with Supabase OAuth authentication for viewing peer gift preferences
- Deployed the web application via Vercel for high availability

EXTRA CURRICULAR ACTIVITIES:

- Participated in Rubik's Cube Speed Solving competitions internationally. 1st Place in intra college competition
- Participated in National level Physics Olympiads in high-school. 1st Runner-up in intra collage competition
- Mentored high-school level students, taught the basics of programming for science competitions
- Self Taught guitarist, performed as the Lead Guitarist in three Rock/Heavy Metal bands locally
